MEDITERRANEAN ECA SURCHARGE WITH EFFECT FROM MAY 1ST 2025

Dear Valued Customer,

To support the reduction of air pollution from ships and enhance air quality, the International Maritime Organization (IMO) is introducing new regulations.

Effective May 1, 2025, the Mediterranean Sea will officially become an Emission Control Area (ECA), requiring lower Sulphur emissions from vessels operating in the region.

In compliance with this regulation, the increased operating costs associated with navigating the Mediterranean zone will be offset by an adjustment to our Low Sulphur Surcharge, applied per trade.

Oceanic Express Line will implement LSS charges on all import and export shipments as follows:

LSS QUANTUM	
Trade	LSS / TEU
Asia - Mediterranean	USD 80
Mediterranean - Asia	USD 80

We appreciate your understanding and ongoing partnership as we work together toward a more sustainable future.

For any questions or additional information, please do not hesitate to contact your sales representative.

Sincerely
Oceanic Express Line
